

japinjava 07-31 04:28 AM Hi all. I'm looking for a IC than can handle at least 50mA and is standard sized (same as US keyboard. It is for an internal project so it will probably end up using a FPGA which will also be standard sized. I'm fine with NOT having a nice flashy logo or industrial design on the IC. However, I would like a company name and at least a company contact number (it will be a long term hardware purchase) on the IC. The original design was NOT created by me, so I'm not really in a position to ask for "this is what you should put on it" from the actual designers. Do any of you know of a company who can do this for me? Thanks, Buddy buddy - he left 10-06 05:58 PM there is a visa employee named sunai choudhary who belongs to canada, she has been doing this for a while now. contact her if you want something done in canada. chowni

01-25 12:36 AM The final decision has been made, thanks for your participation! I don't know when the process will end but it will happen shortly... hopefully before the end of the year. For those of you who are still waiting, we will keep you informed! Sid - what about your sign-up? do you have any idea when you will get an answer? We are all in the same situation, lets keep this thread alive so that people in the same position as us can stay in the loop, thanks. Buddy - I have sent mail to the address you mentioned, in the meantime please take a look at the new thread here, my hope is that with this thread there would be more people on the waiting list.

sbdogg 04-30 06:23 PM Hey Guys, Just to follow up on this thread for any folks that don't know how things are going: I had started the process on 8/25/09 and I think I hit my success point in the efile system the night before on 8/24. On that same day, I got a call from an agency in Canada with a few questions about my original application, most of which were unrelated to getting a I-140

approval. I told them my efile agent was
